Projects

GOSpot

[Live](#) • [Github](#)

Bet your in-game items on professional CS:GO matches.

- ❖ Single-page web application built with a Rails RESTful API serving an Ember.js client-side server via Active Model Serializers gem
- ❖ Revolves around a parimutuel betting system to determine payout odds
- ❖ Implements a bin-packing algorithm to quickly and efficiently distribute winning payouts

RateMyWizards

[Live](#) • [Github](#)

Search, browse, like and write reviews for the wizards at Hogwarts.

- ❖ Single-page web application built on Rails and FLUX/React.js
- ❖ Secure custom user authentication with BCrypt's salted hashing algorithm
- ❖ Integrates Cloudinary API for scaled, quick image uploads and rendering

BestTris

[Live](#) • [Github](#)

Browser version of the classic puzzle game Tetris.

- ❖ Ground-up implementation with Javascript, jQuery, and HTML5 Canvas
- ❖ Utilizes wall-kick algorithm and difficulty scaling with game progression
- ❖ Allows combination line clearing for a bonus score multiplier
